BROPHY FPV CLUB · FLIGHT CLEARANCE

Want permission to fly on campus?

Every drone, every pilot, every flight. Club or personal, FPV or DJI, a whoop or a 5-inch: nothing flies at Brophy without the certification below and a yes from Mr. Burr.

Flight Clearance page

BADGES · PORTFOLIO · FORM

STEP 1 · ONCE · NEVER EXPIRES

Get Brophy Drone Certified

Four badges on the Flight Clearance page. About 45 minutes, at home, all four reviewed by a mentor.

01 **FAA TRUST**

Take the free FAA TRUST test online (20 min) and send a photo of the certificate.

02 **Safe Flight**

Pass the Safe Flight quiz: the Brophy rules, who flies, who watches, go / no-go.

03 **Pilot Agreement**

Read the terms, print the one-page agreement, sign it with a parent, send a photo.

04 **Drone Portfolio**

Add the drone you will fly: a picture, its specs and a one-minute flight video.

Done? You are Brophy Drone Certified for every drone in your portfolio. Club drones are added when you pass their checkpoint on the Pilot Path.

STEP 2 · EVERY FLIGHT

Ask Mr. Burr, 24 hours ahead

His Google Form, once per flight. A club meeting is one request for the whole group, filed by a mentor; a personal flight is your own. **Bring a spotter.** He answers by email: fly only what he approved. **No answer means no.**

THE PERMISSION FORM

Clearance is per pilot and per drone. Certified once; permission every time.
